B

Centromeric families

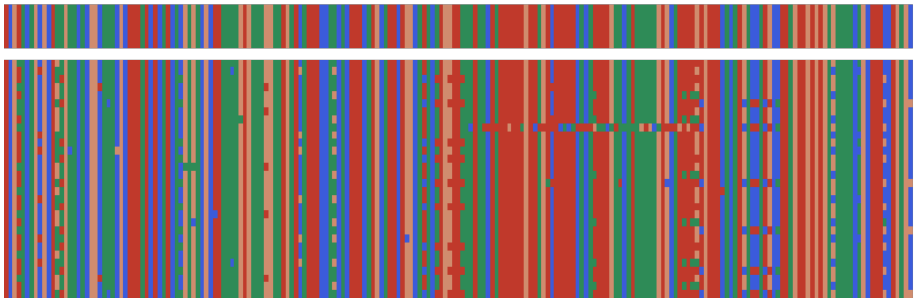

GarSat03 *C. gariepinus* LG09

226 bp · rows 96 % identical to consensus

MacSat03 *C. macrocephalus* LG07

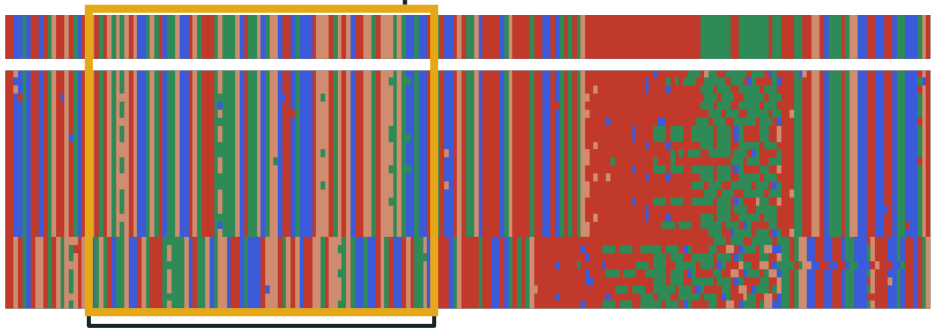

213 bp · rows 96 % identical to consensus

5S-related families

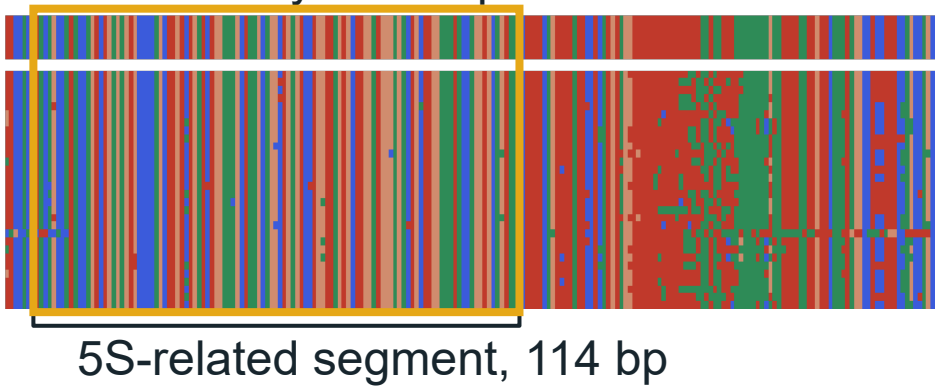

GarSat04 *C. gariepinus* LG09

5S-derived · 217 bp · rows 76 % identical

MacSat06 *C. macrocephalus* LG01

5S rDNA array · 218 bp · rows 95 % identical

A C G T rows = consecutive monomers; columns = aligned positions
